PROFESSIONAL SUMMARY

Engineering Manager and hands-on architecture leader with 10 years of experience delivering enterprise payments and advertising-data platforms for global clients across the US, UK and South Africa. Currently leads two concurrent client engagements of roughly 5–12 people each — directly managing about half of the combined team (performance, mentoring, career growth, hiring decisions) and providing technical leadership to partner-vendor engineers. Owns solution design, engineering execution, production quality, releases and stakeholder alignment, with a record of 100% client satisfaction, zero escalations and multi-year client retention. Experienced in cloud-native and event-driven architecture, and in applying AI to engineering — AI-assisted delivery, RAG, LLM and MCP prototypes. Claude Certified Architect; AWS, Azure and GCP certified; valid B1/B2 visa.

10 yrs
engineering & team leadership

160K+
daily banking transactions at 99.9% uptime

20–30%
productivity lift from AI-assisted workflows

90+
data sources integrated on one platform

CORE COMPETENCIES

People Management & Performance Reviews · Cross-Vendor Technical Leadership · Delivery & Release Ownership · Solution Design & Architecture · Cloud · Event-Driven · Serverless · Payments & ACH · API & Connector Platforms · AI-Assisted Engineering · RAG · MCP · Global Stakeholder Management

PROFESSIONAL EXPERIENCE

Successive Digital · Noida, India
Aug 2017 – Present

Technology Manager · Hybrid — Nov 2024 – Present

- Lead two parallel fintech and media-data engagements with 5–12 contributors each, coordinating architecture, roadmap trade-offs, sprint execution, quality gates, production releases and client communication across the US, UK and South Africa.
- Directly manage about half of the combined team — performance appraisals, feedback, mentoring, career growth and hiring decisions — and guide partner-vendor engineers as technical lead.
- Led modernization of Payliance settlement and return processing on Azure Functions and Service Bus, with retry and error-handling patterns, secure configuration and phased merchant onboarding.
- Drive Data Refinery platform upgrades and connector delivery; coordinate enrollment and fraud-control improvements across API, UI and QA teams with production-readiness reviews.
- Introduced AI-assisted development and documentation practices, improving engineering productivity by ~20–30%; guided schedule-intelligence, LLM and MCP integrations as proofs of concept.

Technology Lead · Hybrid — Jul 2021 – Nov 2024

- Led end-to-end delivery of multiple applications for global clients with 100% client satisfaction and zero escalations, contributing to multi-year engagements.
- Owned technical delivery and design decisions across MERN, PHP and GraphQL ecosystems; managed cross-functional teams (PM, QA, BA).

  Connectors (Media · team of 11): 90+ data-source integrations (Facebook Ads, Google Campaign Manager) with OAuth, scheduled ingestion and reporting.

  Data Serve (Media): Cross-cloud data serving across AWS S3, Google Cloud, Azure ADLS and Snowflake; automated enterprise data pipelines.

  Enrollment & Transactions (Banking): White-labeled ACH debit payments with fraud detection and transaction workflows for a US bank.

Software Engineer — Oct 2019 – Jul 2021

- Technical lead for 3 concurrent application pods at a global advertising enterprise, coordinating releases across Node.js, React, Redux and GraphQL applications.

Associate Software Engineer — Mar 2018 – Sep 2019

- Led a team of 4 engineers delivering full-stack applications and APIs; improved customer satisfaction by ~50% through performance and reliability work.

Software Engineer Trainee — Aug 2017 – Feb 2018

- Developed internal meeting-room booking and HR document automation tools (PHP, Laravel, Lumen).

SELECTED PROJECTS

Payments — BIM Enrollment & Transactions — Fintech · Team Lead → Engineering Manager · 2017 – Present
White-label ACH enrollment and payment operations — merchant mapping, returns and settlements, fraud detection and scoring, compliance reporting, Plaid and Socure identity flows; event-driven jobs modernized on Azure.

Data Refinery & Connectors — Media technology · Technical Lead · 2019 – Present
Governed data ingestion and activation for Dentsu International: 90+ data sources with 1–2 day onboarding and delivery to AWS, Google Cloud, Azure and Snowflake.

AI-Driven Datasource Intelligence & MCP — 2026 proofs of concept · with Amit Bora
Schedule- and configuration-risk recommendations learned from historical pipeline behavior (XGBoost, explainable ML), plus read-only API exposure through an MCP server — experimental, not production.

Taxonomy — Media advertising · Senior Developer
Dynamic Handsontable spreadsheets generating unique campaign identifiers with dependency rules for partners such as Coca-Cola and Microsoft (React, GraphQL, Node.js, MongoDB).

PERSONAL PROJECTS

AI Brand Assistant (RAG chatbot) — React · Groq API · Llama 4 Scout
Chatbot on a personal-brand site that answers questions grounded in a structured knowledge base: intent classification and synonym-expanded retrieval select the top chunks, which are injected into the prompt and streamed from the LLM.

"The Series" portfolio platform — React · TypeScript · Vite · Vercel · built AI-assisted with Claude Code
Data-driven, streaming-style portfolio template deployed for three professionals, with automated pipelines for resume PDFs (headless Chromium), portrait cutouts and AI upscaling — prawal-the-series.vercel.app.

Android Notes App · Published builds — Android · Web · itch.io
Android notes app with folders, editor and quick actions; a live school website (sunriseschoolkandi.org); and an anime-style visual novel published on itch.io.

TECHNICAL SKILLS

Architecture & Cloud: Cloud-native systems, event-driven architecture, serverless, microservices, Azure Functions, Azure Service Bus, AWS, Azure, GCP, Docker, CI/CD

AI: LLM integrations, RAG (Retrieval-Augmented Generation), Agentic AI, MCP, Claude API & Agent SDK, prompt engineering, machine learning (XGBoost)

Languages & Frameworks: JavaScript, TypeScript, Node.js, React, Redux, PHP, Laravel, Python, REST, GraphQL, Apollo

Data: MongoDB, Azure SQL, MySQL, PostgreSQL, Snowflake, Azure ADLS, AWS S3, OAuth integrations

Practices: Engineering management, Agile/Scrum, release management, code review, testing (Jest), stakeholder communication

CERTIFICATIONS

- **Anthropic:** Claude Certified Architect – Foundations (2026)
- **AWS:** Certified AI Practitioner (2025); Certified Developer – Associate (2022); Certified Solutions Architect – Associate (2021)
- **Microsoft:** Azure AI Fundamentals (2022); Security, Compliance & Identity Fundamentals (2022); Azure Data Fundamentals (2021); Azure Fundamentals AZ-900 (2021)
- **Google Cloud:** Cloud Digital Leader
- **Scrum Alliance:** Certified Agile Leadership Essentials, CAL-E (2023)
- **ICTRD:** Artificial Intelligence and Machine Learning Program (2026)

HONORS & AWARDS

- **ESOP Ownership Achievement** — May 2026
- **Outstanding Contribution** — May 2026
- **Employee of the Year** — 2023
- **Key Contributor** — Apr 2023
- **Longevity Award** — Apr 2023
- **Exceptional Performer** — Mar 2022
- **Extra Achiever's Award** — Mar 2021
- **Client Happiness** — Mar 2019
- **Star Performer** — Feb 2019
- **Star Performer** — Jul 2018

EDUCATION

Bachelor of Technology — Computer Science — Maharshi Dayanand University · 78% 2012 – 2016

ADDITIONAL

- Contributor — "The Subtle Art of Effective Communication" (organizational book on communication and listening).
- Conferences — AI Impact Summit 2026 and Convergence India Expo 2026 (Bharat Mandapam), AWS Public Sector Symposium 2023, MongoDB.local, IAMAI India Digital Summit; dentsu "Building Generative AI Solutions" hackathon (2023).
- Languages — English · Hindi · Punjabi (native or bilingual).
