- Experience with the **AGILE methodology**.
- Versatile team player with good communication, analytical and interpersonal skills.
- Experience with React Ul frameworks like **Material UI**.
- Have experience with Okta, and Google SO for authentication.
- Excellent skills in programming using a wide variety of languages and ability to adapt new latest technologies & work in Multi-platform environment.

**Responsibilities:-**

- Participate in requirement understanding. architectural, and design decisions for the applications along with architects.
- Review code, ensure best practices, and coding standards are followed.
- Fix bugs and issues. Find performance issues and fix them.
- Leading a development team, and mentoring them.
- Ensuring the application is compliant with the security guidelines.

## Technology & Security Expertise

- **Technologies:** Redux, NodeJS, Phinx, Twig, Javascript, PHP, ECMAScript, Azure, React Js, jQuery, AWS, Typescript, Apollo GraphQL, CSS3 and HTML5
- **Databases:** MySQL, PostgreSQL, MongoDB, MSSQL
- **Third Party Libraries:** Google Place APIs, husky, enzyme, Google OAuth, ESLint, Swagger, Axios, Nodemon, jest
- **Frameworks:** Laravel, Restler, Lumen , Express (JS Framework)

## Professional Experience

### Project Name: BIM

**Duration:** 4 years 3 months

**Technologies:** PHP, Phinx, Twig, jQuery

**Databases:** MySQL

**Third Party Libraries:** Socure, SmartyStreet , Plaid

**Frameworks:** Restler

**Modules:** Enrollments, Transactions, Reporting, Authentication, Scoring, Fraud Detection, Client Boarding Wizard

**Description:** BIM provides payment solutions to merchants with an easy-to-use API that can be used with their e-commerce applications. BIM is the solution merchants can use to power in-store, mobile, and web commerce. It works as a white-labeled ACH Debit payment tender with the help of Yodlee and plaid for the IAV process that easily integrates into existing mobile apps and websites. Backend admin panel with APIs for enrollment of customers and transactions for handling any fraud or customer-related issues. Full-fledged web app with APIs whereby the APIs can be used in mobile apps for payment at different places. Reporting Jobs for all the enrollments and transactions for different partners.

**Responsibilities:**

- Technical Lead and Project Manager.
- Managing a team of six.
- Gathering requirements from the client.
- Delivery of the successful increment in every sprint.
- Demo execution to Business.
- Client meetings and communications.

### Project Name: Connectors

**Duration:** 8 months

**Technologies:** ReactJS, Javascript, TypeScript, ECMAScript, GraphQL, Nodejs, Apollo Server

**Databases:** MongoDB

**Frameworks:** ExpressJS

**Modules:** Connectors Creation, Datasource Creation, Authorization(OAuth & Creds Based), Scheduling, Data Fetching, Report Generation, Report Downloading

**Description:** Providing a way to users to connect to various data sources like Facebook Ads, Google campaign manager, Twitter, Snapchat, etc including more than 200+ connectors using Adverity by providing them dynamic forms, authorizations of their accounts(Using various credentials or OAuth), scheduling and fetching of data and reporting.

**Responsibilities:**

- Team Lead managing the whole team for the smooth execution of the project.
- Gathering requirements from the client.
- Delivery of the successful increment in every sprint.
- Demo execution to the Business.

### Project Name: Data Serve

**Duration:** 8 months

**Technologies:** Javascript, ECMAScript, GraphQL, React Js, Nodejs, Apollo Server

**Databases:** MongoDB

**Frameworks:** ExpressJS

**Modules:** Data Serving, Connect to various third party DB Tools, Data Download, Custom Data Range Data Download in Different Formats

**Description:** Providing a commonplace to review the end data, download that for various different time periods, and also connect to various third-party tools to access your data. This is what the application

was designed to do as the name suggests to serve the data to the end-user.

**Responsibilities:**

- Team Lead managing the whole team for the smooth execution of the project.
- Gathering requirements from the client.
- Delivery of the successful increment in every sprint.
- Demo execution to the Business.

### Project Name: Taxonomy

**Duration:** 7 months

**Technologies:** NodeJS, Javascript, TypeScript, ECMAScript, GraphQL, React Js, Apollo Server

**Databases:** MongoDB

**Third Party Libraries:** Handson-table

**Frameworks:** ExpressJS

**Modules:** Name Generator, HandsOnTable, Data Dependency Handling

**Description:** Worked on Handsontable to create a dynamically generated spreadsheet with multiple different dynamic configurations acting as unique IDs for Dentsu advertisements(Partners like CocaCola, Microsoft). Handling various conditions on Handsontable based on the values of dependencies selected in the form.

**Responsibilities:**

- Developing the solution to the problem.
- Optimization of the existing solution to improve performance.
- Timely delivery of the product before deadlines.
- Demo at the end of the sprint.

### Project Name: TruckBoard

**Duration:** 3 months

**Technologies:** ReactJS, Redux, Javascript, PHP, CSS, HTML

**Databases:** MySQL

**Third Party Libraries:** Google Place APIs, Google Maps

**Frameworks:** Laravel

**Modules:** Tracking, Booking, Map View, Details, Admin Panel

**Description:** USA-based company to track truck drivers' details, locations, and booking of those trucks. The users can also see in the map the truck location based on longitudes and latitudes. The application was meant to keep records and tracks of all the truck and driver details.

**Responsibilities:**

- Support Lead in managing the smooth execution of the project.
- Developing various modules and designing the architecture of the project.
- Successful delivery of the project.
- Client meetings and communications.

### Project Name: ACL URL Shortener

**Duration:** 2 months

**Technologies:** Redux, NodeJS, Express js, React Js

**Databases:** MongoDB

**Frameworks:** ExpressJS

**Modules:** URL Shortener, Authentication, Reporting, Admin Panel, Single URL Shortener, Batch URL

Shortener

**Description:** Project to shorten the URLs for different banks used for promotional purposes. Handling of the reporting for the shortened data. The URLs for various banks contain a lot of information and look bad to the end-user. So the main focus of the app was to shorten the URLs so that they can look fine for the end-users.

**Responsibilities:**

- Developing the solution to the problem.
- Optimization of the existing solution to improve performance.
- Timely delivery of the product before deadlines.
- Demo at the end of the sprint.

### Project Name: StormSmart

**Duration:** 2 months

**Technologies:** PHP, HTML, CSS, jquery

**Databases:** PostgreSQL

**Frameworks:** Laravel

**Modules:** Employee, Authentication, Admin Panel, Users, Skills

**Description:** CRUD-based project to handle all the information regarding entities related to the StormSmart company. The company basically dealt with providing various services in their country related to prevention from storms that can allow in reduced destruction and prevention from the damage caused by the storms.

**Responsibilities:**

- Developing the solution to the problem.
- Optimization of the existing solution to improve performance.
- Timely delivery of the product before deadlines.

### Project Name: Meeting Booking & HR Letter App

**Duration:** 4 months

**Technologies:** PHP, Javascript, CSS, jQuery, HTML

**Databases:** MySQL

**Frameworks:** Laravel & Lumen

**Modules:** PDF Generation, Dynamic HR letters Generation, Meeting Booking, Calendar Invites, Admin Panel, Email Notifications

**Description:** The basic idea of the project was to provide a way for the employees of the company to be able to book meeting rooms in advance and raise a request for a room. HR letter app was made to ease the working of HRs in generating various offer letters in PDFs and dynamically generating various forms.

**Responsibilities:**

- Developing the solution to the problem.
- Optimization of the existing solution to improve performance.
- Timely delivery of the product before deadlines.
- After delivery support.

## Certifications

**AWS Certified Solutions Architect Associate** - Certificate
**Issuing Organization:** Amazon Web Services AWS

**Issue Date:** 21/09/2021 | **Expiry Date:** 21/09/2024

- **Microsoft Certified Azure Fundamentals** - Certificate
  **Issuing Organization:** Microsoft
  **Issue Date:** 15/10/2021
- **Microsoft Certified Azure Data Fundamentals** - Certificate
  **Issuing Organization:** Microsoft
  **Issue Date:** 04/12/2021
- **Microsoft Certified Azure AI Fundamentals** - Certificate
  **Issuing Organization:** Microsoft
  **Issue Date:** 10/02/2022
- **Graph Developer Associate** - Certificate
  **Issuing Organization:** Odyssey
  **Issue Date:** 13/01/2022
- **Microsoft Certified Security Compliance and Identity Fundamentals** - Certificate
  **Issuing Organization:** Microsoft
  **Issue Date:** 14/05/2022
- **AWS Certified Developer Associate** - Certificate
  **Issuing Organization:** Amazon
  **Issue Date:** 27/11/2022 | **Expiry Date:** 27/11/2025
- **Graph Developer Professional** - Certificate
  **Issuing Organization:** Odyssey
  **Issue Date:** 13/12/2022
